

PUSH TO TALK LTD

EVERYBODY INSTANTLY

What is Push to Talk?

By pressing just one button on your mobile you can instantly talk to one or everybody in your chosen group, anywhere, all at the same time. The PC client allows an administrator to instantly talk to a driver or group of drivers at the click of a mouse at no cost.

How does it work?

PTT acts like a global walkie-talkie using the GPRS connection on your mobile. We text you free software that sets up your mobile.

Equipment and network requirements?

No need to change anything, even if in contract. PTT works on all Nokia handsets and across the O2, Vodafone and Orange networks.

CASE STUDY: for Acme Haulage Ltd

Acme Haulage Ltd has 30 vans and drivers who deliver perishable commodities on a daily basis. Time of delivery and accuracy of orders are vital. An administrator communicates with drivers with each other by mobile phone.

Acme have found mobiles worked well for them but the limitation of talking to just one driver at a time was affecting their operations. When there was an incorrect delivery or job turnaround time needed, customers had to hang on the line or be called back. 2 way radios were needed, but the range was not far enough.

Push to Talk Ltd supplied PTT to their mobiles. Acme noticed an almost immediate improvement in productivity as admin time in contacting drivers was drastically reduced. Customers were also happier because they got instant answers while on the line. Acme also found that many small delivery problems could be solved by drivers talking between their regional teams using PTT.

Wylie Cayote, Transport Manager said, "Our deliveries run smoothly, our customers are satisfied and our drivers more motivated. Fantastic result. PTT has saved us a lot of money and made my life easier".

08452 334455

Widely used in the USA, Push to Talk is the newest, fastest and most cost effective communication system for business mobiles

Where's Barry?

Improving productivity and cutting costs

Feature	Benefit
