

PUSH TO TALK LTD

EVERYBODY INSTANTLY

What is Push to Talk?

By pressing just one button on your mobile you can instantly talk to one or everybody in your chosen group, anywhere, all at the same time. The PC client allows an administrator to instantly talk to a driver or group of drivers at the click of a mouse at no cost.

How does it work?

PTT acts like a global walkie-talkie using the GPRS connection on your mobile. We text you free software that sets up your mobile.

Equipment and network requirements?

No need to change anything, even if in contract. PTT works on all Nokia handsets and across the O2, Vodafone and Orange networks.

CASE STUDY: Ipswich Hospital, public sector

The Ipswich Hospital NHS Trust runs one of the largest general hospitals in East Anglia. Their porters were using pagers but this was shown to be inefficient as delays occurred between the 'page' and a porter calling in. As administration could not rapidly locate porters resources could be poorly allocated.

To solve these problems, Ipswich hospital decided to put Push to Talk (PTT) on their porters' mobile. Using a PC client meant that each porter could be contacted instantly at no cost, either individually or within groups. Result: response times increased and costs were reduced.

Ipswich Hospital said "“Push to Talk is safe to use around patients and it gives us control with flexibility” and further stated “they [PTT] are available 24/7 and it only takes them five minutes to make any change to the system we need”.

08452 334455

Widely used in the USA, Push to Talk is the newest, fastest and most cost effective communication system for staff mobiles

MOVING MRS SMITH?

Improving productivity and cutting costs

Feature	Benefit
Instant contact between staff and office	Staff productivity gains
