What is Push To Talk ?

Instant one to many chat over your mobile
Turns your mobile into two way radios but with a global range
It uses the GPRS data connection on your mobile
The newest and most efficient way to stay in contact with your team

How does PTT work?

We send you software that embeds itself into your mobile
The software links to your contacts and sets up your PTT button
Press the talk button to speak to all your selected contacts at once
Calls are played through your mobile's speaker like a walkie talkie

Reduce your costs

No need for new handsets as PTT works with Nokia mobiles
Average 10Mb data usage per month
No calling cost as it uses your mobile's existing data package
Only uses data when you actually speak

Tell me more

£10 per month for unlimited usage
Try out PTT for a month
3 or 12 month contracts
